ULTIMATE NGOBENI

Software Engineer · BSc Honours, Computer Science & Informatics

Gauteng, South Africa · +27 76 328 7936 · ngobeniultimate@gmail.com
Portfolio: ultimate-portfolio-six.vercel.app · GitHub: github.com/Ultimate458-non · LinkedIn: linkedin.com/in/ultimate-ngobeni-156b1a224

PROFILE

Final-year BSc Honours student (University of the Free State, completing November 2026) and full-stack developer with hands-on experience in C# (.NET), React and PostgreSQL. Led the full-stack application that won first place in the BBD Best Repo competition, led a top-3 team at the BizTech Nexus hackathon, and built the Honours capstone ITSL system, which serves 100+ students and enforces its rules at database level. Top 15% academic achiever (Golden Key). South African citizen, available to start in January 2027.

SKILLS

Languages	C#, Python, JavaScript, TypeScript, SQL
Frameworks	.NET, React, Next.js, Node.js, Express, FastAPI, Deno
Data	PostgreSQL, Supabase, SQL Server, MongoDB, SQLite, relational design and normalisation, row-level security, stored procedures, triggers, data warehousing
AI & Cloud	PyTorch, Transformers (FinBERT fine-tuning), NLTK, prompt engineering, AWS (AI Practitioner Foundations, training badge)
Practices	Git and GitHub, REST APIs, microservices, Agile, requirements gathering, user stories

EDUCATION

BSc Honours, Computer Science & Informatics 2026 (completing Nov 2026)
University of the Free State

- Distinctions in Natural Language Processing, Data Warehousing, Human-Computer Interaction and Introduction to Research.

BSc Information Technology, major in Computer Science 2023 – 2025
University of the Free State

- Distinctions in Software Engineering and Data Analytics for Business.

BSc, Mathematics and Chemistry 2021 – 2022
University of the Free State

PROJECTS & COMPETITIONS

ITSL Session Management System — Lead Developer (Honours capstone) 2026
React · Supabase (PostgreSQL) · Deno Edge Functions

- Replaced a spreadsheet-and-email process for 100+ students over a ten-week module with a role-based platform for students, facilitators and a coordinator.
- Enforced every academic rule in PostgreSQL (constraints, triggers, stored functions) so no rule can be bypassed by a modified client request.
- Prevented double-booking of the final seat with row-level locking (*SELECT … FOR UPDATE*); applied row-level security on every table.
- Automated certificate PDF generation and email delivery with serverless functions and scheduled jobs.

BBD Best Repo — First Place — Lead Developer

- Lead developer responsible for the full-stack application that won first place for best repository.

BridgeUni — Team Lead, BizTech Nexus Hackathon (24 hours) — Top 3 Team
MongoDB · Express · React · Node.js

- Led the team and built the full-stack application that gives students one place to find bootcamp and upskilling resources worldwide. Awarded certificates as a top-3 team.

CodeRED — Standard Bank Beat the Banker Hackathon (48 hours)

FastAPI · Streamlit · SQLite · Python

- Built a digital banking and fraud-monitoring demo with a mule-account detection pipeline (heuristic scoring or a model exported from a notebook). Designed the data model used to track scammers; recognised for my data science contribution.

Financial Sentiment Analysis (FinBERT) — Project Lead

Python · PyTorch · Transformers · NLTK · Regex

- Fine-tuned FinBERT on 4,840 labelled financial headlines; handled label noise and class imbalance with a Regex cleaning pipeline and evaluated with macro-F1 so minority classes were not hidden.

UFS Student Recruitment Platform — Lead Developer

C# · .NET · SQL Server · React

- Designed a platform that matches student skills to employer requirements through automated recommendations; led feature delivery with a small team.

EXPERIENCE

Full-Stack Developer Intern Aug – Sep 2025

Codveda Technologies

- Built .NET (C#) microservices and PostgreSQL integrations in an agile team.
- Worked with cross-functional teams to refine user features.

Programming Tutor, First-Year Computer Science Current

University of the Free State

- Teach programming logic, C# syntax, debugging and computational thinking to individuals and small groups; mark practical work and give feedback.

Laboratory Assistant, Department of Computer Science & Informatics Current

University of the Free State

- Monitor lab hardware performance, diagnose network connectivity faults and give first-line technical support to students and staff.

Peer Mentor & Community Volunteer 2024 – 2025

UFS schools outreach and digital literacy

- Guided Grade 9 learners on subject choices; led Microsoft Office and digital productivity workshops at the UFS Cultural Diversity Festival.

CERTIFICATIONS & RECOGNITION

- AWS Skills Center AI Practitioner: Foundations — training badge, verified on Credly
- LinkedIn Learning — Learning Data Analytics: Foundations (Jul 2026)
- Golden Key International Honours Society — top 15% academic performer; regulation committee member
- Huawei Seeds for the Future alumna (2023 – 2024) · Cisco Networking Academy (2024)
- Leadership 2050 Summit 2.0 — certificate of participation (Sep 2024)
